

## Bnx Company "New" announcements.

**DUE TO ADVANCING AGE AND HEALTH ISSUES, THIS SITE, RIGHTS TO ALL SOFTWARE AND SOURCE CODE ALONG WITH THE NAME OF BNX COMPANY IS FOR SALE !!**

Pay Master Pay79hc software series will replace the discontinued Pay Master Pay79hb software. Pay Master Pay79hc has expanded Work Comp Codes, Expanded Payroll Deductions, and many other expanded features. Pay Master Pay79hc will have the ability to provide fast custom features and reports required by our clients ever changing needs and desires.

Pay Master Pay79hc features 3 methods for payroll data input for current payrolls. You can input each employee pay data using the Manual method, Or from a Time Clock Or Remote software data batch file. This feature, shown above is great in reducing the time required for inputting weekly payroll data, yet does not take away from any of your normal operational features.

***Minimum Wage Adjustment Batch files for both regular and H2a employees are automatically generated from menu selections and are ready to post to payroll. Using Time Clock or Batch file data input and Minimum Wage Adjustment Batch files, will allow 1 (one) payroll operator to complete data entry, print reports and checks for 300 to 500 employees in 1 (one) work day!***

**Year To Date H2a Hours offered in master/history files and on check stubs.**

**New Statement of Earnings Report from history showing state taxes in detail to accompany Employees W-2.**

All BNX Company Custom Software is portable. Portable means the software will operate from your C: drive, a memory stick, any USB drive or a external network drive. No formal installation required. Copy Program Folder to any valid drive.

All BNX Company Software is available on a Lease/Purchase plan with monthly payments.
